

ARNAB GHOSH

Software Engineer | Java, Python, JavaScript | OOP · DBMS · Software Development

Kolkata, India | ghosharnab460@gmail.com | +91 8145595626 | linkedin.com/in/arnab404 | github.com/MrArnabGhosh | leetcode.com/Arnab404

PROFESSIONAL SUMMARY

Final-year Computer Science graduate (B.Tech, expected June 2026) with a solid foundation in Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Internship experience across cloud computing (AWS) and backend software development (Django, MongoDB), applying structured software engineering practices to build and maintain reliable applications. Comfortable working to direction, quick to learn new tools, and used to collaborating with teams to deliver on shared goals.

TECHNICAL SKILLS

- Programming & Core CS: Java, Python, C/C++, JavaScript, TypeScript — OOPS, DSA, DBMS, Operating Systems, Computer Networks
- Software Development: Node.js, Express.js, Django, REST APIs, MVC Architecture, JWT Authentication, Agile/collaborative workflows
- Frontend: React.js, Next.js, HTML5, CSS3
- Databases: MongoDB, PostgreSQL, SQL, Mongoose, Prisma ORM
- Cloud & Tools: AWS (EC2, S3, IAM), Git/GitHub, Postman, Linux, VS Code

INTERNSHIP EXPERIENCE

Cloud Computing Intern — Euphoria GenX, Kolkata

Jan 2026 – May 2026

- Applied software engineering practices to deploy and manage secure, scalable cloud applications using AWS (EC2, S3, IAM), following defined processes with reducing supervision

Backend Development Intern — AI Labs, Kolkata

Jun 2024 – Aug 2024

- Built a secure voting system using Django and MongoDB with role-based authentication, following MVC architecture and software design principles
- Designed an optimized database schema, reducing query response time by 30% through analytical, methodical problem-solving

ACADEMIC & SELF-INITIATED PROJECTS

Cloud Keep — MERN-Based File Storage Platform [GitHub](#)

- Designed and implemented a scalable, cloud-native storage platform (React, Node.js, Express, MongoDB, AWS S3) with JWT-based authentication and role-based access control
- Reduced file retrieval latency by 35% by applying efficient caching strategies — demonstrating attention to performance and reliability

AI Resume Builder — ATS-Ready Resume Builder [GitHub](#)

- Developed with Next.js, TypeScript and Prisma ORM (PostgreSQL), integrating an AI API for job-specific resume optimization, with indexed queries and PDF generation

EDUCATION

B.Tech, Computer Science & Engineering (Specialization: Cyber Security)

Jun 2026

The Neotia University, Kolkata — CGPA: 8.48 / 10.0

ACHIEVEMENTS & INVOLVEMENTS

- 1st Position — Coding Competition, Parikalpana 2025, The Neotia University
- Solved 100+ Data Structures and Algorithms problems on LeetCode; participated in Smart India Hackathon 2025
- Active member, Techniche Club — contributed to technical event organization and teamwork
